" Quran in Malayalam, translation by Sun Moon Islamic Forum (RMMP)", in the field of Malayalam.The invention relates to a method of making a bound book, and more particularly to a method of making a book having a cover having an accordion-like bound fold. Printed books are typically formed by assembling a plurality of preprinted pages, which are bound together. A book cover is typically made by applying a transparent plastic cover material to one or more folded plies of an accordion-like cover. The plies can be cut, folded, and glued together to form the accordion-like cover. The book cover is typically glued to the book pages. The book pages and book cover are typically finished off by applying an additional layer of transparent plastic cover material to the book cover, which further seals and protects the book cover. Although the above-described book production process is time-consuming, it produces a good quality book. However, the additional step of gluing the book cover to the book pages is generally undesirable from an efficiency and cost standpoint.. A large number of c-MAFs can be sequenced in a single run, resulting in a significant reduction in costs. However, it is also worth noting that the c-MAFs are only those found in the cDNA. It is possible that mRNAs that do not code for proteins are not necessarily transcribed, or that expressed proteins include sequences that
