Microsoft Windows Category: Windows media players Category: Microsoft free software Category: Microsoft software Category: Microsoft Windows softwareQ: Import module from folder, not just one file I want to make a module that defines functions for all my modules, because I like keeping my folder structure neat. I have a number of modules in a folder, and I would like to be able to import them without importing a file. So for example, if I have - __init__.py - my_module1.py - my_module2.py I would like to do from my_module1 import my_func1 from my_module2 import my_func2 instead of from my_module1 import my_func1 from my_module2 import my_func2 I know that in __init__.py I can do from my_module1 import my_func1 from my_module2 import my_func2 But I would like to have a separate file with just the function definitions, so that I can update them easily. I know I could also write a separate script (called my_functions.py) that just has the definition of the functions (from __future__ import absolute_import), but I don't

think that's what I'm looking for 2d92ce491b
