
Vray For Archicad 16 Free Downlo PATCHED

June 17, 2018 - Corona is by far the best renderer on the market right now for architectural rendering (YES, even better than VRay). And it's coming. Corona (also known as RenderMan) is a renderer that allows you to easily and beautifully (in terms of visualization) draw scenes in 3D. It was designed for 3D rendering, and can't do much else (can't be used for 2D rendering). With it, you can use any 3D rendering software that has Corona support. That's it, all you need is a renderer and a computer with an appropriate graphics card.
