supported just the basic functions of AutoCAD, and was intended for use in educational and hobbyist environments. AutoCAD LT was later discontinued in favor of AutoCAD R14.

AutoCAD and AutoCAD LT support a variety of third-party programs and plug-ins through their Component Object Model (COM) interface. It can also import and export file formats such as Tagged Image File Format (TIFF), File Format Standards Association (FFS) and Geospatial File Format (GFF). Licensing AutoCAD uses a flexible pricing model that incorporates the following: User licenses AutoCAD's standard user licenses and technology licensing are available by subscription, under which customers pay a yearly or monthly fee to the vendor.
