The plug is inserted into the socket so that the contacts are mated with the through holes. However, the contacts of the plug are exposed from the socket when the plug is inserted into the socket, and the contacts may contact the contacts of a mating plug. Therefore, the plug may be damaged when an external force is applied to the coaxial jack connector. Therefore, a heretofore unaddressed need exists in the industry to address the aforementioned deficiencies and inadequacies.Risk factors and epidemiology of bacterial meningitis in a region of southern Brazil. A retrospective study on patients diagnosed with bacterial meningitis in southern Brazil was performed to determine the frequency of meningitis and the risk factors for mortality. The medical records of patients diagnosed with bacterial meningitis from the medical consultation database in two hospitals in southern Brazil were analyzed. Clinical variables and the frequency of bacterial meningitis were studied, and the mortality rate and risk factors for death were evaluated. All patients with meningitis admitted to the two hospitals between January 1998 and December 2002 were included in the study. A total of 105 patients were analyzed, of whom 82 (78.1%) were male and 23 (21.9%) were female. The mean age was 33 years. The most common symptoms were fever (89.5
