$0.00000000 DEATHLOOP is a next-gen FPS from Arkane Lyon, the award-winning studio behind Dishonored. In DEATHLOOP, two rival assassins are trapped in a mysterious world where only a select few may survive NewellMcBeal Profile Joined January 2014 United States 53 Posts Last Edited: 2014-04-17 05:44:43 #5 Use one of these if you want to stream from your pc while you play Basically both are fairly high quality tools that will use the computer graphics card for your game, are easy to use, you can add multiple videos at once, and are fairly lightweight in size. Also, with both these tools, you can even have two video clips be playing at the same time, and you can have video play within a video clip. Just make sure to turn on visual setting for the game you are playing, and then open the game, then right click on the tool and then open the video you want to play as a file in the tool. After you do this, you just have to move the pointer around, and the tool will start playing the video clip. any little help is good and appreciated, good luck with your competition. Mannequin Profile Joined November 2012 United States 7 Posts #6 You guys really need to use discord That is the absolute easiest way to share your public game link. movietools can also be scripted in multiple languages.
