The text you type is the source for the HTML document and the generated HTML is what you see on the right-hand side of the interface. The invention relates to a wet-running clutch with a torque converter, especially a power transmission arrangement having a disk clutch, which is disposed in the torque flow. Wet-running clutch with a torque converter is a power transmission arrangement in which a rotary speed transmission is effected by way of a fluid drive, which rotates along with the transmission input element, such as a crankshaft, and the transmission output element, such as a driving wheel. By a radial clutch which is disposed in the radial region between the rotating and stationary parts, a clutch cone and a clutch plate are connected together in such a manner that they are connected rigidly with each other. By means of a further wet-running clutch, a radially acting thrust is exerted on the clutch cone, which acts 6a5afdab4c
