Photoshop CC 2015 Version 17 Free [Win/Mac]

Photoshop uses one of two workflows for raster editing: pixel-level raster manipulation or raster-to-raster manipulation. Pixel-level editing One of the most basic tasks you can perform in Photoshop is pixel manipulation. If you click on a pixel in Photoshop, you can change its color, create a new image layer, add any number of other layers, use selections and so on. Basic pixel manipulation works well for quick editing tasks, where you want to alter a single pixel, a small portion of a layer, or a group of pixels. Photoshop has four basic tools for working on pixels: • Foreground tools: The Magic Wand, the Quick Selection Tool, and the Polygonal Lasso. The Magic Wand tool can find and pick colors, pixels, and even objects. The Quick Selection Tool lets you select pixels without selecting a color. The Polygonal Lasso lets you draw polygons that contain colors. • Background tools: The Brush tool creates a new layer that you can edit, or you can paint on the selected pixels. The Brush tool is also a good way to paint with other colors. You can also use the Eraser tool to erase pixels. • Erase tools: The Highlighter tool lets you touch up or remove selections, and the Quick Mask tool lets you add or remove pixels. The Eraser tool is a great tool for cleanup. You can erase the pixels that make up a selected layer, or you can simply erase a portion of a layer. • Combine tools: The Smudge tool, the Dodge and Burn tools, the Dodge and Burn brush, and the Color Replacement tool are good for small-scale editing. They let you add or subtract color from a layer, make things lighter or darker, or move colors together. Raster-to-raster manipulation Raster-to-raster manipulation is more like raster editing. You use basic raster tools such as the Tint, Bump, Gradient, and Threshold tools to manipulate multiple layers. Raster tools are more powerful than pixel tools, as they let you create and edit images in an abstract raster-like manner instead of a pixel-level, single-color, binary, or grayscale-based manner. For example, you can make color changes in ways that aren't possible with pixel tools. In addition, you

Stacking-Glyph Dalai Lama to meet Narendra Modi on Chinese visit New Delhi, Feb. 15 (ANI): The Dalai Lama will meet the Prime Minister Narendra Modi on February 21 during his visit to China. This, sources in New Delhi said, comes as a sequel to a meeting between the Prime Minister and His Holiness during the Dalai Lama's visit to India last October. "Prime Minister Narendra Modi and His Holiness the Dalai Lama will meet on the occasion of His Holiness's ongoing visit to China," a statement issued by the Prime Minister's Office said on Friday. "This meeting will be held on 21-22 February, 2016 and will bring the two leaders together to discuss ways to strengthen bilateral ties," the statement said. The Dalai Lama and the Prime Minister met again last October, when Modi had briefed the Tibetan spiritual leader about the government's efforts to promote friendly ties with China and the resolution of differences that had arisen between the two countries due to increasing separatist activities in Arunachal Pradesh. The statement said, "The Prime Minister reiterated the solidarity of the Indian government with His Holiness the Dalai Lama." China has been roiled by a series of separatist protests in Western China that allege Chinese abuses of the ethnic Tibetan population, especially in Tibet.
