What's New In?

Embarcadero Bi-Curious C++  
Embarcadero BCC32C C++ is a  
precompiler compiler for C++  
Win32 that facilitates you with the  
code. You can use it to precompile  
your C++ code into Win32 binary  
or C++ Win32 shared object files.  
You can then employ the binary

---

files for further analysis and integration. It can also help you debug. Embarcadero BCC32C C++ aims to provide all of the tools you need to develop for Win32 in one package. The program provides a command line. You can use it to precompile and compile both C and C++ files. You can use BCC32C to develop 32-bit Delphi and Object Pascal applications. You can work on C++ Builder, Delphi, Visual C++, and C# projects. You can use it to solve ordinary problems. Embarcadero Bi-Curious C++ is a

---

command line C/C++ Win32 compiler/assembler. In addition, the software provides a set of useful command line tools. With BCC32C, you can assemble and precompile your projects. BCC32C provides a command line. You can use it to compile, link, precompile, and assemble your project. It can help you compile and link C++.EXE,.OBJ and.DLL files. It also contains 16 common build tools. Embarcadero Bi-Curious C++ Features: Supports multiple programming languages. Allows

---

building and debugging 32-bit Delphi and Pascal applications. Emits 32-bit C++ Win32 and C++ shared object files. Contains a Borland C++ Builder project file converter. Supports C++ Builder 6, 7, and Delphi. BCC32C is compatible with Visual C++ 6.0, Visual Studio.NET, Visual C++ Express Edition, Visual C++ 7.0, Visual C++ 7.1, Visual C++ 7.1.NET, Borland C++ Builder 6, and Borland Delphi 7. You can find out more details on the product page at [Embarcadero BB2006C C++](#)
