What's New in the?

Windows 8 provides a new lock screen that prompts you with a rich set of personalization options that can be customized for you. It is also an opportunity to leverage your favorite websites or your favorite mobile apps. Add a new start page to the lock screen with the ability to modify, pin or unpin applications on the start page. It has built-in authentication so you can seamlessly log in without having to type in a user ID and password. Darling's developer-made Calendar v1.6 for Windows 8 Description: I created Darling's Calendar to be a free (GPL) replacement for Microsoft's mobile-only calendar system. Unlike the Microsoft Calendar app, Darling's Calendar does not require you to subscribe to the service in order to use it. You can set the app to check for calendar events once per day, or the app will use your Windows Live account to create and maintain events on your behalf. - Simple, unobtrusive interface. - You can sync events to your Windows Phone, Windows, Mac, or Linux system. - Events are supported for birthday, anniversary, meeting, to-do, task, web search, and so on. - You can also add custom items to your calendar, and create your own event types. - Calendar can view shared calendars for free. - You can add calendar events to the calendar by using a Windows Live ID, and you can create a Windows Live account if you do not have one. - You can synchronize events with your phone. - You can connect your calendar to your Windows Live Mail account. Additional Notes: This program uses a binary library called MBI, which was

System Requirements:
