11 results - I once updated Nano Station M2 from firmware 5.5.6 to 5.6.5. . . I thought I upgraded it to Windows 10 pro . I upgraded to windows 10 pro and i got a lot of errors. Then I decided to try to restore it to the original Windows XP operating system. I was using the Windows XP Repair Tool and there was an error on the install screen and I got multiple results. Then I tried to restore the system to default. But this error I encountered just didn't go away. I got a lot of Rollback Failed errors.
