
FS2004 - VRS - F A-18E Super Hornet Crack

Superbug for FSX and P3D is a fully operational simulator of the F/A-18E aircraft of a professional level. The Superbug combat system and TacPack (.rar) are the only simulators that provide real-time flight. At the same time, there was no simulator that reproduced the flight in any wind. The Superbug Simulator takes full advantage of the F/A-18E. It makes it possible to fly in any weather conditions, at any time of the day, in any weather and even in any flight modes. If you can control flight in the air, then Superbug can control flight in the sky. The simulator is fully automated.
