

Game details RealFlight 8. RealFlight 8 is a unique flight simulator designed not for "real" aircraft, but to simulate the flight of "model" aircraft. RealFlight, since the first edition, is back and even better...and now it's even better. Unfortunately, some critics say that RealFlight 8 is not a simulator, but a simulation program. But if you remember that RealFlight was originally intended only for "simulation", then we will be right. The flight of a model simulated in RealFlight may look beautiful, but it will never look like a real model. It's more like flying over points on a map. It's not that it's bad, it's just not as realistic as other programs.
