Unlimited DataMiner is an exciting, useful, and completely free application that is designed to help you mine and extract data from hundreds of data sources including Microsoft Access, MySQL, SQL Server, Oracle, PostgreSQL, MSSQL, and Excel. To build a data mining process using DataMiner, you need to select what data sources to search from, what parameters to use, and then search for answers to your questions. DataMiner offers a convenient interface to save and load results from data mining. SQL Server 2000/2005/2008/2010 Connector is the most reliable and fastest way to connect to SQL Server Database from Java or.NET application. With it you can connect to SQL Server databases from.NET and Java applications without any additional libraries. Just use JDBC to connect to your SQL Server. There are 2 ways to use the Connector. • The simplest way is to create objects of SQLServerConnection and SQLServerDriver using JDBC. • The second way is to use the SQLServerDriver. • Driver is used to connect to the database. • The Driver has different methods and properties to communicate with database. IE Help Express is an offline help for Internet Explorer. With a simple click you can access any Internet Explorer help topics without an internet connection. IE Help Express was tested with Internet Explorer 7.0 - 9.0. if.exe is a lightweight, fast, FREE, easy to use, reliable and dependable PHP file compare tool that works both in command line mode or in a WSH script. If.exe may also be used in HTML and javascript as a file upload input field. If.exe is compatible with Windows 95, 98, Me, 2000, NT4, XP, Vista, 7 and 8. It comes in 2 versions: 64-bit and 32-bit. The 32-bit version may require a PHP version greater than 5.1.1. If.exe also includes a file size comparison utility that can be run as a stand-alone script. This is an unofficial fork of the y

What's New In Jashsoft Ping Tool?

Jashsoft Ping Tool is a widget that will easily solve your problems.. Just key-in your router IP and you are all set! Jashsoft Ping Tool sends and receives hidden packets and dosent let your connection go idle and hence you get great speed! Requirements: ⏵ Yahoo Widget Engine Q: Rails4 ActionMailer without action_controller: generating html? I have an application where I want to use ActionMailer in the model to send email. The body of the email is in a view partial. I have generated an email method in the model, and it seems to be working. But when the email is sent, it's not generating the required html. I've tried 2 different ways of generating the html, and it's always incorrect. In the following example, the code is in the model, but the method is the same. @user.email In the view This outputs Instead of Is there a way of getting html to be outputted in this way? A: Rails has a method named as_email that you can use to generate the email. @user.as_email A: You can use as_html method: In my view: In mailer: def as_html(options={}) options[:template] ||= 'your_template_path' html = render(template: options[:template],
