[www.tutorialforphotoshop.net](http://www.tutorialforphotoshop.net) ## Paper You've probably never heard of it, but `_paper_` is a powerful tool in a photographer's toolbox that enables you to shoot and print on the same photographic paper. This is highly useful for photographers who have to be very creative with their images or even who must vary images from print to print to get the variety they want. Beware, however, because there are several types of paper to choose from, including blueprints and handmade papers, and papers with elements

designed to give your images unique characteristics. Compatible Paper: Most (but not all) papers are not compatible with the same kinds of photo printers. In other words, you can't take photos directly to your printer or computer and have them print out the way you want them to. However, some papers are compatible with certain types of printers and printers. While in this chapter we're most concerned with the types of paper that are compatible with the printers that work with your computer, you may wish to purchase paper with unique effects in mind for your final products. Blueprints: When I first started to publish paper prints, I spent much time looking for the right kind of paper that would print great on my hot-press printer. I found that there were only a few types of paper that are compatible with a hot-press printer, as well as special papers for that purpose. The easiest and most cost-effective type of paper is a glossy paper called blueprint paper. These papers are the

same type of paper used for business printing of course, but the quality is superb for many types of photography. They are printed with a hot-press printer, which means that the ink from the paper is heated and then pushed through the paper onto the object or photograph. This is also the type of paper used when a photographed print is placed on an album sheet for viewing in an album. You'll find these papers sold in the office supply section of the local camera store.

**\_Handmade Papers:\_**  
Handmade papers are a special type of paper that has been used to print images that have special effects. These effects can include metallic look, special color, frosting, and even the look of a watercolor-like paint.

What's New In?

A new poll by Fox News and Democratic pollster Mike Murphy found that the Republicans had lost the governor's race, with Gov. Charlie Baker (R) leading incumbent Democrat Satinay Patel by two points among likely voters in the race. Baker will face state Rep. Karyn Polito (D) in a runoff election on June 2. The poll revealed that Baker's support among Republicans had fallen by 23 points since September, while Patel gained one point among Democrats. ADVERTISEMENT Independents turned to Patel by a 30-point margin. While Baker is at 37 percent, a Baker victory would be a major victory for the Republican Party in Massachusetts, which has not

elected a Republican governor since 1991. Baker has struggled against President Trump Donald John Trump Federal prosecutor speaks out, says Barr 'has brought shame' on Justice Dept. Former Pence aide: White House staffers discussed Trump refusing to leave office Progressive group buys domain name of Trump's No. 1 Supreme Court pick MORE and remains popular despite a state budget surplus. Baker's popularity has taken a hit over an increase in gas prices, rising health care costs, and the construction of a state prison in his hometown of Beverly, Mass. Baker won the primary over state Rep. Geoff Diehl (R) in August, a win that was expected after Diehl received the endorsement of President Trump. A Quinnipiac University poll released on Tuesday found that Baker had opened up a nine-point lead over Patel. The survey revealed that Baker would receive 40 percent of the vote, Patel would receive 30 percent and Diehl would receive 10 percent. The poll of 403 likely voters was
