When you install the program it will ask for a serial number, be sure to write it down. Install it as you would any other program. At the setup site, enter your serial number, then click the activate button. The crack file will be downloaded to your desktop. Extract it using WinRAR or 7-zip, depending on your version. Open the installer, and select to run it as administrator, or give it "Full Control" access to the executable. By selecting that option, you will then be prompted to enter your serial number. You will also be prompted to enter the administrator password, if one was not provided. After that, the crack will be installed. If you do not wish to use the crack you can close the installer and exit the program. There are still some issues with the.exe file, but the crack fixed that for me. I will let you know if I have anymore problems. If you do have any problems, please report them below in the comments section. 3. Direct download from our mirror:
