### [Download](#)

The item works particularly great. It's the most comprehensive and best-in-class build-and-copy software for Windows. Now HDClone can work on pictures, videos and on the disk sector scanning can begin. You get such software suite as iDrive and PhotoDirector and also award-winning programs such as Windows Media Player, Media Monkey, Microsoft Office, and Photoshop. The Standalone SATA Hard Drive Duplicator is capable of selecting between multiple drive images. As a result, you can save several drive images on a single library drive on a single SSD or HDD. This makes it an ideal tool for IT professionals. For example, suppose you have a variety of standard software packages that are used by different user groups. You could store each image separately, then select between them using the SATA Hard Drive Duplicator. This makes it quick and easy to setup a number of new computers. The current version 4.0.4a Portable of the software is the fourth version of HDClone which we have released, which we consider to be the best yet. This version of the product has the following major new features: Automatic UNDO/REDO support for recovery or partial recovery of the hard drive images Unstable images were deleted Full support for SED format file extension Multilingual support for 6 languages (German, English, French, Italian, Portuguese and Spanish) Setting data protection for individual images Drag and drop feature for storing drive images to the list of images Compatibility with Windows Vista/7/8 Direct installation in the Windows Start menu
